

*Dear Harmony and Kim,*

*I have attempted to write this testimonial about ten times and have deleted the document several times with tears in my eyes. Every time I got started, I was broken to tears and couldn't finish the letter. This, hopefully, is my last attempt.*

*Here we go ...*

*About 8 months ago, my 16-year old daughter and I visited your office after her attempt to commit suicide. She was on medication for depression, which continued to break her spirit and make her so unhappy that I hardly recognized her. Like any other parent, I was desperate to find answers and to bring my daughter back from her nightmares. The depression caused her to lose sleep and eventually affected her whole body. She suffered from excruciating pain all over her body. I couldn't even touch or hug her and she never smiled. Talking to people and friendships was unreachable to her and I felt hopeless. I prayed God would give me a solution.*

*Then God sent me two angels.*

*Harmony, you and Kim have saved my daughter's life and have rebuilt our relationship. Ever since she has been under your care, she is a happy person, sleeps through the night, suffers little to no pain and has found a comedic side of her personality. Now, I can't get her to stop "talking." Her friends and family members can hardly recognize her and she is comfortable in her own skin.*

*I appreciate everything you do for her and I will always be grateful for your warm words and gentle advice. You have changed our lives and we will never forget.*

*What else can I say ... thank you!!*

*Mother and Daughter*
