

*"I have been going to Integrative Acupuncture for almost a year. My daughter introduced me to Harmony Brown. What a wonderful and caring lady she is.*

*I could hardly walk when I started going to her. I have Rheumatoid Arthritis (RA) and two other types of arthritis. The drugs used to help with the RA deplete the body of other things it needs. Harmony set me on a program to instill in my body what the drug treatments were taking away. She has held my hand, so to speak, through this whole process of getting better. She has been a wonderful physician.*

*Harmony is partners with another acupuncturist named Kim who has also helped me. The people in this office are ALL committed to helping and healing.*

*Anyone who needs this type of treatment (and everyone does ... they just don't know it) should have one office visit at Integrative Acupuncture, because you will certainly want to go back! They help heal the mind as well as the body.*

*You will not find two more dedicated physicians ANYWHERE. Harmony and Kim are the best!"*
